WHEREAS, the Grantor has entered into a Note Purchase Agreement and promissory notes dated as of January 9, 2017 (the “**Purchase Agreement and Notes**”) with each Secured Party and other holders of the Notes (the “**Noteholders**”) party thereto.

WHEREAS, as a condition precedent to the purchasing of the Notes by the Noteholders under the Purchase Agreement, the Grantor has executed and delivered to the Noteholders that certain Security Agreement dated as of January 9, 2017 made by and among the Grantor and the Noteholders (the “**Security Agreement**”).

WHEREAS, under the terms of the Security Agreement, the Grantor has granted to the Noteholders a security interest in, among other property, certain intellectual property of the Grantor, and has agreed to execute and deliver this Patent and Trademark Security Agreement, for recording with national, federal and state government authorities, including, but not limited to, the United States Patent and Trademark Office.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Grantor agrees with each Secured Party as follows:

1. Grant of Security. The Grantor hereby pledges and grants to each Secured Party a security interest in and to all of the right, title and interest of the Grantor in, to and under the following, wherever located, and whether now existing or hereafter arising or acquired from time to time (the “**Patent Collateral**”):

(a) the patents and patent applications set forth in Schedule 1 hereto and all reissues, divisions, continuations, continuations-in-part, renewals, extensions and reexaminations thereof and amendments thereto (the “**Patents**”);

(b) the trademark registrations and applications set forth in Schedule 2 hereto, together with the goodwill connected with the use of and symbolized thereby and all extensions and renewals thereof (the “**Trademarks**”), excluding only United States intent-to-use trademark applications to the extent that, and solely during the period in which, the grant of a security interest therein would impair, under applicable federal law, the registrability of such applications or the validity or enforceability of registrations issuing from such applications;

(c) all rights of any kind whatsoever of the Grantor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world;

(d) any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and

(e) any and all claims and causes of action, with respect to any of the foregoing, whether occurring before, on or after the date hereof, including all rights to and claims for damages, restitution and injunctive and other legal and equitable relief for past, present and future infringement, misappropriation, violation, misuse, breach or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Recordation. The Grantor authorizes the Commissioner for Patents, the Commissioner for Trademarks and any other government officials to record and register this Patent and Trademark Security Agreement upon request by either Secured Party.

3. Note Documents. This Patent and Trademark Security Agreement has been entered into pursuant to and in conjunction with the Security Agreement, which is hereby incorporated by reference. The provisions of the Security Agreement shall supersede and control over any conflicting or inconsistent provision herein. The rights and remedies of each Secured Party with respect to the Patent Collateral are as provided by the Purchase Agreement and the Notes, the Security Agreement and related documents, and nothing in this Patent and Trademark Security Agreement shall be deemed to limit such rights and remedies.

4. Execution in Counterparts. This Patent and Trademark Security Agreement may be executed in counterparts (and by different parties hereto in different counterparts), each of which shall constitute an original, but all of which when taken together shall constitute a single contract. Delivery of an executed counterpart of a signature page to this Patent and Trademark Security Agreement by facsimile or in electronic (i.e., "pdf" or "tif" format) shall be effective as delivery of a manually executed counterpart of this Patent and Trademark Security Agreement.

5. Successors and Assigns. This Patent and Trademark Security Agreement will be binding on and shall inure to the benefit of the parties hereto and their respective successors and assigns.

6. Governing Law. This Patent and Trademark Security Agreement and any claim, controversy, dispute or cause of action (whether in contract or tort or otherwise) based upon, arising out of or relating to this Patent and Trademark Security Agreement and the transactions contemplated hereby and thereby shall be governed by, and construed in accordance with, the laws of the United States and the State of California, without giving effect to any choice or conflict of law provision or rule (whether of the State of California or any other jurisdiction).
