PATENT AND TRADEMARK SECURITY AGREEMENT dated as of March 31, 2023 (this “Agreement”), among: Crane Holdings, Co. (to be renamed Crane NXT, Co. on or about the Availability Date); Crane & Co., Inc.; Crane Payment Innovations, Inc.; Crane Security Technologies, Inc.; and Cummins-Allison Corp. (each, a “Grantor” and collectively, the “Grantors”), and JPMORGAN CHASE BANK, N.A., as Administrative Agent.

Reference is made to (a) the Credit Agreement dated as of March 17, 2023 (as amended, restated, amended and restated, supplemented or otherwise modified from time to time, the “Credit Agreement”), among the Company, the Borrowing Subsidiaries party thereto, the Lenders party thereto and JPMorgan Chase Bank, N.A., as administrative agent (in such capacity, the “Administrative Agent”), and (b) the Collateral Agreement referred to therein. The Lenders and the Issuing Banks have agreed to extend credit to the Borrowers subject to the terms and conditions set forth in the Credit Agreement. The obligations of the Lenders and the Issuing Banks to extend such credit are conditioned upon, among other things, the execution and delivery of this Agreement. The Grantors party hereto are, or are Affiliates of, the Borrowers, will derive substantial benefits from the extension of credit to the Borrowers pursuant to the Credit Agreement and are willing to execute and deliver this Agreement in order to induce the Lenders and the Issuing Banks to extend such credit and as consideration for extensions of credit previously made to continue to be outstanding.

Accordingly, the parties hereto agree as follows:

Section 1. Terms. Each capitalized term used but not otherwise defined herein shall have the meaning specified in the Credit Agreement or the Collateral Agreement, as applicable. The rules of construction specified in Section 1.03 of the Credit Agreement also apply to this Agreement, *mutatis mutandis*.

Section 2. Grant of Security Interest. As security for the payment and performance in full of the Secured Obligations, each Grantor pursuant to the Collateral Agreement did, and hereby does, grant to the Administrative Agent, its successors and assigns, for the benefit of the Secured Parties, a security interest in all of such Grantor’s right, title and interest in, to and under any and all of the following assets, whether now owned or at any time hereafter acquired by such Grantor or in, to or under which such Grantor now has or at any time hereafter may acquire any right, title or interest (collectively, the “Patent and Trademark Collateral”):

(a) (i) all letters patent of the United States of America or the equivalent thereof (including industrial designs) in any other country, supranational authority or any political subdivision of the foregoing, all registrations thereof and all applications for letters patent of the United States of America or the equivalent thereof (including industrial designs) in any other country, supranational authority or any political subdivision of any of the foregoing, including, in the case of any Grantor, any of the foregoing set forth under its name on Schedule I hereto, and (ii) all reissues, continuations, divisionals, continuations-in-part, reexaminations, supplemental examinations, *inter partes* reviews, renewals, substitutions, adjustments or extensions thereof, and the inventions disclosed or claimed therein, including the right to make, have made, use, offer to use, sell, offer to sell, dispose, offer to dispose of, import or export the inventions disclosed or claimed therein; and

(b) (i) all trademarks, service marks, trade names, trade styles, trade dress, logos, and other similar source or business identifiers, designs and general intangibles of like nature, all registrations thereof, and all registration applications filed in connection therewith, including registrations and registration applications in the United States Patent and Trademark Office or any similar office in any State of the United States of America or any other country, supranational authority or any political subdivision of any of the foregoing, all extensions or renewals thereof, and all common law rights related thereto, including, in the case of any Grantor, any of the foregoing set forth under its name on Schedule II hereto, (ii) all goodwill associated therewith or symbolized thereby and (iii) all other rights in or to any of the foregoing.

Section 3. Intellectual Property License. Pursuant to the Collateral Agreement, for the purpose of enabling the Administrative Agent to exercise rights and remedies under Article IV of the Collateral Agreement at such time as the Administrative Agent shall be lawfully entitled to exercise such rights and remedies, each Grantor has granted to the Administrative Agent, to the extent of such Grantor's rights and effective only during the continuance of an Event of Default, an irrevocable, nonexclusive license (exercisable without payment of royalty or other compensation to the Grantors, but subject, in the case of Trademarks, to sufficient rights to quality control and inspection in favor of such Grantor to avoid the risk of invalidation of such Trademarks) to exploit, license or sublicense any of the Article 9 Collateral consisting of Intellectual Property owned as of the date of the Collateral Agreement or thereafter acquired by such Grantor, and wherever the same may be located, and including in such license reasonable access to all media in which any of the licensed items may be recorded or stored and to all computer software and programs used for the compilation, printout, display, transfer, disclosure, processing or sharing thereof and the usernames, passwords and related information required to access the foregoing, the right to prosecute and maintain all such Intellectual Property and the right to sue for infringement of such Intellectual Property (all subject to the limitations set forth in Section 4.03 of the Collateral Agreement).

Section 4. Collateral Agreement. The security interests granted to the Administrative Agent herein are granted in furtherance of, and not in limitation of, the security interests granted to the Administrative Agent pursuant to the Collateral Agreement. Each Grantor hereby acknowledges and affirms that the rights and remedies of the Administrative Agent with respect to the Patent and Trademark Collateral are more fully set forth in the Collateral Agreement, the terms and provisions of which are hereby incorporated herein by reference as if fully set forth herein. In the event of any conflict between the terms of this Agreement and the Collateral Agreement, the terms of the Collateral Agreement shall govern.

Section 5. Counterparts. This Agreement may be executed in counterparts (and by different parties hereto on different counterparts), each of which shall constitute an original, but all of which when taken together shall constitute a single contract. This Agreement shall become effective when a counterpart hereof executed on behalf of the Grantors shall have been delivered to the Administrative Agent and a counterpart hereof shall have been executed on behalf of the Administrative Agent. Delivery of an executed counterpart of a signature page of this Supplement that is an Electronic Signature transmitted by emailed pdf. or any other electronic means that reproduces an image of an actual executed signature page shall be effective as delivery of a manually executed counterpart of this Agreement. The other provisions of Section 9.06(b) of the

Credit Agreement are hereby incorporated by reference, *mutatis mutandis*, as if set forth in full herein.

Section 6. Incorporation by Reference. The provisions of Sections 1.03, 1.04, 6.02, 6.04, 6.05, 6.06, 6.09 and 6.10 of the Collateral Agreement are hereby incorporated by reference herein as if set forth in full force herein, *mutatis mutandis*.

## II. U.S. Patent Applications<sup>3</sup>

Registered Owner	Title of Patent	Patent Application Number	Patent Application Filing Date
Crane & Co., Inc.	Performance adhesive for security documents	16775103	2020-01-28
Crane & Co., Inc.	Micro-optic security device with zones of color	16996718	2020-08-18
Crane & Co., Inc.	Surface applied micro-optic anti-counterfeit security device	17419212	2018-12-27

<sup>3</sup> The Grantors have filed unpublished patent applications that have been omitted from these schedules. Such patent applications will be identified after they are published in accordance with the notice provisions of the Loan Documents.

Registered Owner	Title of Patent	Patent Application Number	Patent Application Filing Date
Crane & Co., Inc.	Use of nanoparticles to tune index of refraction of layers of a polymeric matrix to optimize microoptic (mo) focus	17612932	2020-05-20
Crane & Co., Inc.	Use of nanoparticles to tune index of refraction of layers of a polymeric matrix to optimize microoptic (mo) focus	17612949	2020-05-20
Crane & Co., Inc.	Use of nanoparticles to tune index of refraction of layers of a polymeric matrix to optimize microoptic (mo) focus	17612962	2020-05-20
Crane & Co., Inc.	Micro-optic security device with absolute registration	17616098	2020-06-12
Crane & Co., Inc.	Micro-optic security device with phase aligned image layers	17757204	2020-12-17
